Skills

I'm a passionate, self-taught full stack developer that enjoys creating robust solutions. I'm good at efficient problem solving, adjusting to environment/stack/requirements changes and fast learning. I'm fluent in English, TypeScript/JavaScript, PHP and CSS. I know Node and frontend frameworks (React, Vue) well, currently learning Go in my spare time for personal CLI tools. My personal open source achievement is [this Vue custom directive](#) that gained some traction without any promotion.

Experience

MARCH 2021 - PRESENT

Gravity Global, remote – Full stack developer

- Maintaining good code and work quality in the current project's team as main developer
- Unusual/hard tasks in various technologies, both front and back end (React, Vue, PHP, WordPress, JavaScript, TypeScript, Node.js)
- Improving workflows
- Projects I've worked on were primary websites built with/on top of WordPress. Most notable:
 - Northwestern Media radio stations - rebuild of big legacy project that includes WordPress website, multiple Node servers, live radio updates and mobile apps. Radio player was rebuilt from Vue to React, mobile apps are in Vue + Cordova, Node servers are responsible for websocket connections and API updates
 - Huumans application (Wellonomics before rebrand) - app for employers and employees to track their wellbeing. Initial project was built in Vue, our version used React for visual reporting system for employers
 - Columbia Threadneedle Investments (merge with BMO) - merging two big financial websites into one. Some custom elements (like fund tables) on the platform were built in React

JULY 2017 - JUNE 2021

Press-Service Monitoring Mediów, remote – Media analyst

- Analyzing and summarizing TV, radio and press materials looking for requested keywords
- I've created radio stations schedule scraper
- It taught me fast typing, parsing information quicker and remote work. It has also expanded the way I think as I was confronted with various world views

Education

2017

Politechnika Lubelska, Lublin – Computer science

Unfinished due to personal reasons.

2014 - 2017

I Liceum Ogólnokształcące im. Stanisława Staszica, Lublin

Class with extended curriculum in Mathematics and English.

Certificates

[Introduction to Java](#) - Hyperskill - July 2022

[Back End Development and APIs](#) - freeCodeCamp - July 2020

[Front End Development Libraries](#) - freeCodeCamp - July 2020

[JavaScript Algorithms and Data Structures](#) - freeCodeCamp - April 2020

[Responsive Web Design](#) - freeCodeCamp - April 2020

Project Management Principles - Zwolnieni z Teorii - May 2016
