Maciej Ziemichód

> I'm a web developer based in Lublin.
>
> My main focus area has been front-end development with Vue, but I enjoy creating all kinds of applications. I am very quality-conscious, self-disciplined and eager to learn.

Work experience

Media Analyst

Press-Service Monitoring Mediów, *remote – (Jul 2017 - Present)*

I am responsible for dividing TV/radio segments thematically as well as assigning keywords and summaries to them. I have also created a schedules scraper for me and my coworkers, to have all of them in one place.

Junior Developer

LSIT, *remote – (Jun 2020 - Jul 2020)*

I was helping in developing the PHP/JS e-commerce framework in its early stages. It was a remote internship.

Skills

Technology

JavaScript

My "native" programming language. I've used it in the front-end with React, Redux, Vue and Vuex. I've also used it in the back-end for APIs with Express and Cheerio for scraping. After using TypeScript a little bit, I plan to learn it thoroughly.

Styling

I enjoy writing pure CSS the most, especially using CSS variables, but there were projects involving Sass, Bootstrap, Materialize and BEM methodology. For mock-ups I reach for Figma.

Databases

For personal projects I mostly use localStorage. I've also used MongoDB and in my internship the custom framework involved MySQL.

PHP

My remote internship was all about creating custom e-commerce framework, where I learned PHP. I I had created a simple plugin for WordPress as well.

Languages

Polish

Native speaker

English

Proficient speaker

Articles and Resources
